

Quality Policy Statement

Always working for a sustainable tomorrow.

Who we are

Repak ELT is a company limited by guarantee. Established in 2015 to deliver a producer responsibility scheme for waste tyres. The scheme operates under the approval of the Department of Environment, Climate and Communications (DECC) in accordance with the Waste Management (Tyres and Waste Tyres Regulations) 2017 (S.I. No. 400/2017) to ensure the environmentally sound management of waste tyres.

As the Approved Body Repak ELT undertakes to operate the tyre compliance scheme with a commitment to:

• Integrity

How we achieve success is important. We undertake to be accountable, honest, ethical and compliant in all we do.

• Collaboration

We commit to work with and take care of our members, our community and the environment.

• Leadership

We strive to be thought leaders championing sustainable outcomes for End of Life tyres through innovative solutions and influencing the regulatory framework using waste as a resource.

As compliant operators our Members waste tyres are collected and recycled at no cost to their business. We commit to always making compliance a benefit to Member businesses, while rigorously challenging non-compliance.

Compliance is monitored by process measures and both internal and external audits. Compliance is also maintained by the timely implementation of corrective actions and the assessment and management of risk.

Repak ELT is committed to the continual improvement of its performance through interaction with members, staff, collectors, regulatory authorities and the community. This continual interaction is achieved through the sitting, monitoring and review of quality objectives and targets.

To assist with the above, Repak ELT has implemented a Management System and has been externally certified as being up to ISO 9001:2015 standard.

Meeting these standards is the responsibility of the entire team. Repak ELT is therefore committed to working with all stakeholders to support effective operation of the company's Quality Management System and the achievement of goals and specific Quality Objectives.

William Collins
